SUMMARY

MCA Data Science (2025) graduate pivoting to **Product Management**, **Product Analytics**, and **Business Intelligence**. Strong in **SQL**, **Power BI**, **Metabase**, **Advanced Excel**; experience building automated workflows, cohort segmentation, and driving data-driven product initiatives to optimize operations and revenue growth.

EDUCATION

Presidency College (Autonomous) <i>Master of Computer Application in Data Science</i>	Bengaluru, India Nov 2023 – Nov 2025
Royal Global University <i>Bachelor of Computer Application</i>	Guwahati, India Oct 2019 – Oct 2022

TECHNICAL SKILLS

Analytics & BI: SQL (CTEs, window functions), Power BI, Metabase, Advanced Excel
Product & Business Analytics: Cohort Analysis, KPI Design, Gap Analysis, Funnel Tracking, MIS Reporting
Programming & AI: Python, Data Wrangling, Web Scraping
Databases & Automation: n8n, Git, MySQL, PostgreSQL, MongoDB, VS Code

EXPERIENCE

Business Analyst (Product & Analytics) <i>BimaKavach</i>	Nov 2025 – Present <i>Bengaluru</i>
– Drove a 0-to-1 Greylabs AI voice bot pilot qualifying 3,000+ daily inbound leads; optimized auto-dialer workflows by defining queue management, prioritization, and CRM handoffs. – Spearheaded company-level financial and operational metric analysis supporting a Rs. 100 Cr Series-A fundraise; contributed critical insights for investor pitch decks and due diligence. – Engineered an automated client cohort analysis framework, reducing turnaround time from ~2 days to ~5 minutes; formulated customer segmentation strategies to evaluate cross-sell and upsell performance. – Led the end-to-end data migration of 90,000+ policies across ~40 data points from legacy systems to Vaatun, restructuring architectures for 12K direct and 40K partner clients to enable RCA-ready reporting. – Defined LSQ activity tracking for offline RM-assisted journeys and owned RM allocation logic across India, assigning leads based on entity type, revenue, and GWP to optimize relationship coverage. – Developed centralized Power BI and Metabase dashboards tracking operational and financial KPIs, standardizing logic for end-to-end business visibility and faster management decision-making.	

PROJECTS

SmartShelf (Semantic Book Recommender) <i>Python, HuggingFace, LangChain, Gradio</i>
– Built an AI recommendation engine that maps user emotional cues to book embeddings; processed 10k+ titles with transformer-based sentence embeddings. – Integrated HuggingFace models with LangChain for context-aware retrieval; improved top-5 precision by 12+ pts in offline evals (semantic similarity benchmarks). – Designed a Gradio UI for instant search and feedback; median recommendation latency <300ms with cached embeddings and vector store (ChromaDB/FAISS). – Implemented NLP pipelines: sentiment detection, zero-shot classification, and embedding similarity to produce personalized, controllable recommendations.
UPI Transaction Analytics Dashboard <i>Excel, SQL, VLOOKUP, XLOOKUP</i>
– Cleaned and transformed raw UPI transaction data using Advanced Excel and SQL to establish a reliable data source for performance reporting. – Integrated multi-source datasets to streamline reconciliation workflows, building an interactive dashboard to track payment trends, revenue, and business KPIs.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

Presidency College (Cybersecurity Society): Head of the Cybersecurity Society; coordinated DSA-IT Club activities and organized technical workshops covering industry-standard cybersecurity tools.

TryHackMe: Ranked in the Top **2%** globally, completing advanced hands-on security labs across web security, networking, and privilege escalation.

Event Leadership: Mentored students for **5+ years** at Northeast India's largest interschool IT fest and conceptualized Technophilia, an inter-university IT fest.
